BAND STORY

"

We deliver original sound that pierces the mind and body, nothings left out, from our death vocals to our grinding drumbeats and guitar riffs that make you wanna head bang hard as a mother f****r. Even our style is unique, we offer custom guitar designs, custom album art, custom vinyl' s for either guitar or vehicle usage. We don' t compromise, that' s what makes us ready for a world of music that' s been done, ready for that mainstream influence, which we then smash, ridding the audience of a same-ish sound and replenishing their senses with much missed originality
